Hiroshima is the story of six people--a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest--who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

This is the much anticipated Third Edition of the original award-winning volume. Fully indexed and updated, this edition covers the same topics as the First and Second editions but with new information for 2021 onwards. The book begins by examining key mistakes teachers make in the 'direct realm' - i.e. when interacting face-to-face with students. These first three chapters cover rapport-building, active-engagement and behavior management as it applies in a high-school setting. Following this, the book expansively covers a range of tips, techniques and tools to engage advanced, exam-level learners and to effectively enhance the teaching process via the use of technology. The book concludes with an often overlooked sphere of teaching: how to work effectively with colleagues and parents (very powerful when strategized correctly). Bonus material on the unique challenges of teaching overseas is provided in a plenary chapter. This edition of the book has been exhaustively proofread and indexed, and is of a much-higher quality than can be attributed to the First and Second editions.
