Get ready for Christmas with a fun-filled project that not only offers a holiday activity for the whole family but also makes a charming keepsake decoration. One side of this festive model looks like a traditional cut-and-assemble building and the other reveals the interior of Santa's workshop. The dollhouse-like effect includes scenes of Santa's elves at work and Mrs. Claus in her office, checking off a list of naughty or nice names. No prior experience is necessary for assembling this easy-to-make scale model. Detailed instructions and diagrams explain every step of the assembly process, from cutting, folding, and gluing to adding the finishing touches.

Seminar paper from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: 1,0, University of the West of England, Bristol (Bristol Business School), course: Strategic Management, language: English, abstract: The Volkswagen Group - from a company providing affordable cars for the German people to a global group producing broad-range models including premium vehicles for upper-classes. The success of the today's VW AG began in 1937 when VW was founded with the intention to provide affordable cars for the German people. After years of developing further models, acquisitions of other car manufacturers such as Audi and SEAT, and starting international operations, the Volkswagen Group has become the largest automobile manufacturer in Europe and one of the leading car producers worldwide. Today there are almost 50 production plants in Europe, America, Asia and Africa. (Datamonitor 2008) The Volkswagen AG consists of two divisions. Next to the Financial Services Division there is the Automotive Division that develops vehicles and engines, produces and sells passenger cars, commercial vehicles, trucks, buses, vans, pick-ups and campers. Brands that are part of the VW Group include: VW, Audi, SEAT, Lamborghini, Skoda, Bentley and Bugatti. (Datamonitor 2008) Concentrating on the Automotive Division, the Volkswagen Group's strategy is analysed by looking at its value chain. It is examined what is performed well, where strengths are that create value, and what might be improved.

Research Paper (undergraduate) from the year 2016 in the subject Business economics - Industrial Management, grade: 3,7 (93%), California State University, Fullerton, language: English, abstract: The paper analysis the automotive industry in general as well as the relative position of the Volkswagen AG. Furthermore, VW's competitors are assessed and recommendations for actions are formulated. In the beginning the creation of the automobile seemed less of a need and more of a luxury, as the cars could only be afforded by the well off. The very first steam car took to the road in France in 1768 - but Cugnot's novel idea did not trigger the beginning of the car industry. After Henry Ford's model made its debut, owning a car was a symbol of status, because it could only be afforded by the wealthy. Once the process of Henry Ford's mass production was introduced, cars could be afforded by a wider dynamic of people, and ownership became an affordable growing trend. The production of automobiles was a great help to the economy. It provided jobs across industries including positions in steel and machine tool makers for the different metal parts of the car. The increase in the need of supplies and other parts of the car including the battery, head lights, paint, and interior upholstery, were the driving forces for new businesses to thrive. Cars being a part of the everyday norm meant they would need routine car maintenance which became a major source of business. This also led to the increase of petroleum sales as the demanded use of cars increased. When WWII came the US was able to use the jeep for military use, additionally Chrysler reworked the jeep design to create tanks. Moreover, car production in Europe turned its focus from "the people's car" to cars designed for the military.
