One of the most important things for either a man or woman to know or at least make the effort to learn, is what makes their significant other tick. You must be alert and attentive to the wants and the needs and the desires of the other, put them first in your life. In order to make Valentine's Day a spectacular it's essential that you truly know the heart and desires of your mate. The investment of time and effort and thought during the year leading up to Valentine's Day are critically important. The expenditure of that time and effort to gain that knowledge is the investment that shows the love for one another is not just a one day a year thing. Real love is earned every day of the year and not just on special occasions. It is not enough to buy a card and some flowers the day before or the day of Valentine's Day. It truly is not the present or the card or the flowers that express the messages you want to communicate to the loved one you chose above all others. The present is the time and the effort as well as the card and the flowers together that is the ultimate expression of the love you feel and the love you share. You can only fail to show your love and cause the "I am taking you for granted" feeling" if you don't make the properly directed effort to be actually interested in your loved one every day. Then you can show on one day, Valentine's Day, what effort you have made all year long to that one person you love. The evidence of your efforts is the actual gift on Valentine's Day. The time it took you to think ahead, find out what was important to the one you love and to arrange the shopping spree, the purchase of the jewellery, the tickets to the game or the show or to prepare the special meal is actually the gift of love. Properly directed, thoughtful time and effort throughout the year are the evidence of your love. The card and the flowers and the unexpected actions are intended to reveal the existence of your love. You must give of yourself in order to give the love you want to share with your loved one. The day to day effort you expend to know and to understand the one you love is what is important. Finding out their inner secrets and wants and needs is the effort required to make a Valentine's Day special. If both the man and the woman make that daily effort to know one another better every day, then there will be love.

Ee have been deploying Lean Six Sigma in various large and medium size companies for many years and have realized excellent results in most instances. We found that while Lean Six Sigma does a great job addressing the primary concerns of manufacturing and service, we felt that there was something missing in the deployment of Lean Six Sigma programs at many companies. Something that could help foster sustainable breakthroughs; something to realize durable performance and sustainable quality enhancement based on a happy and engaged workforce, something to create a real learning organization in which people are working smarter, are committed and improve themselves continuously. We found that the results could be enhanced if the importance of Human Capital is considered as an integral part of the process. We learned that Lean Six Sigma, in itself, does not sufficiently address Human Capital at many companies. While expected results from Lean Six Sigma alone will be good, we believe that adding the human component to Lean Six Sigma has the potential to realize sustainable, long-term growth and produce a transformation into a lean, learning, prosperous organization. That's why we are launching a revolutionary, holistic concept in this book called TPS-Lean Six Sigma. Combining these complimentary processes actively brings human involvement into Lean Six Sigma in a manner that not only stimulates commitment, integrity, work-life balance, and passion, enjoyment at work and employee engagement but also stimulates individual and team learning in order to develop a happy workforce and sustainable performance improvement and quality enhancement for the organization. TPS-Lean Six Sigma is a continuous voyage of discovery involving continuous personal and organizational improvement, development, and learning. The starting point in this concept is a journey to understand personal goals and ambitions of the workforce. Then we take the organizations goals and ambitions and marry them with the workforce, and find the best people for the job. Using our structured approach for aligning the personal scorecards with the organization's scorecard, we are able to create a symbiotic relationship between employees and organizational desires through the establishment of Lean Six Sigma project teams that will enthusiastically drive positive results. TPS-Lean Six Sigma is like a 'turbo-charged' Lean Six Sigma program. All of the proven, sound methodologies of traditional Lean Six Sigma are charged with highly motivated team members. The result is a powerful people driven Lean Six Sigma program called TPSLean Six Sigma that leads to a High Performance Culture and allows employees to realize their full potential and contribute creatively while the organization benefits from increased profitability, market share, and customer satisfaction. People are happiest when they are given freedom, challenges, and control over their lives. TPS-Lean Six Sigma also offers a systematic and integrated approach to the transformation of people in organizations, and to impact business strategy, culture, organizational effectiveness and the controllability of business processes. It entails a learning process, which transforms people into happy, inwardly involved, and committed employees. This will not only allow them to contribute exceptionally but will also persuade them to support, defend, and promote their organization. This approach lies at the heart of successful organizational and cultural change. After all, it is difficult to change the organization, but if we change ourselves, the organization will change with us. This unique TPS-Lean Six Sigma system is based on several new models, guidelines and tools that have been proven in practice. It integrates the individual's aspirations with the shared ambition of the organization, balancing the personal with the shared ambition, embedding ethical behavior in the individual's mind and links individual capabilities with an effective talent management process. TPS-Lean Six Sigma and the related new tools provide an excellent and innovative framework for creating sustainable breakthroughs in both the service and manufacturing industries. This new book emphasizes the introduction of a new blueprint, called TPS-Lean Six Sigma, for addressing the primary concerns of manufacturing and service in a more sustainable and humanized way. It leads to a High Performance Culture and allows employees to realize their full potential and contribute creatively while the organization benefits from increased profitability, market share, and customer satisfaction. By way of this book, Hubert Rampersad & Anwar El-Homsi are launching a revolutionary, holistic concept which actively has human capital embedded in Lean Six Sigma in a manner that not only stimulates commitment, integrity, work-life balance, passion, enjoyment at work and employee engagement but also stimulates individual and team learning in order to develop a motivated workforce and sustainable performance improvement and quality enhancement for the organization.

Highly practical and straightforward, this action-focused guide helps you shape the future of leadership. Teach people skills that have been proven effective again and again, as you show them how to: Be the example that sets the tone at the top Inspire high performance, creativity, and innovation Challenge people to push their comfort zone, and enable them to succeed Provide support, encouragement, and guidance around obstacles As Baby Boomers retire in record numbers, the need for real, effective leadership is growing greater than ever; at the same time, there has never been a more disparate set of opinions about what "leadership" actually means. A Coach's Guide to Developing Exemplary Leaders provides an evidence-based model to help you develop leaders with real, quantifiable, tangible skills.
