NEW YORK TIMES BESTSELLER • The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon, from the bestselling author of *Shadow Divers*. "Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy." —Andy Weir, #1 New York Times bestselling author of *The Martian* and *Artemis* By August 1968, the American space program was in danger of failing in its two most important objectives: to land a man on the Moon by President Kennedy's end-of-decade deadline, and to triumph over the Soviets in space. With its back against the wall, NASA made an almost unimaginable leap: It would scrap its usual methodical approach and risk everything on a sudden launch, sending the first men in history to the Moon—in just four months. And it would all happen at Christmas. In a year of historic violence and discord—the Tet Offensive, the assassinations of Martin Luther King, Jr., and Robert Kennedy, the riots at the Democratic National Convention in Chicago—the Apollo 8 mission would be the boldest, riskiest test of America's greatness under pressure. In this gripping insider account, Robert Kurson puts the focus on the three astronauts and their families: the commander, Frank Borman, a conflicted man on his final mission; idealistic Jim Lovell, who'd dreamed since boyhood of riding a rocket to the Moon; and Bill Anders, a young nuclear engineer and hotshot fighter pilot making his first space flight. Drawn from hundreds of hours of one-on-one interviews with the astronauts, their loved ones, NASA personnel, and myriad experts, and filled with vivid and unforgettable detail, *Rocket Men* is the definitive account of one of America's finest hours. In this real-life thriller, Kurson reveals the epic dangers involved, and the singular bravery it took, for mankind to leave Earth for the first time—and arrive at a new world. "Rocket Men is a riveting introduction to the [Apollo 8] flight. . . . Kurson details the mission in crisp, suspenseful scenes. . . . [A] gripping book." —The New York Times Book Review

A natural hazard is a physical event but a disaster is a social and political phenomenon. Natural hazards are, for the most part, unavoidable and apolitical. However, they carry with them serious political, economic, and social consequences. Disasters also have adverse consequences on human rights standards. An understanding of the relationship between disasters and human rights outcomes requires knowledge of how disasters increase grievance and frustration, and impact the probability of contentious political behavior. To date, there has been little empirical or theoretical research on the specific circumstances under which disasters impact antigovernment political behavior, and even less is known of the causal chain between a natural disaster, protest activity, and human rights violations. In this book, Clair Apodaca maps a comprehensive causal model of the complex interactions between disasters and human rights violations. She claims that pre-existing inequalities and societal grievances turn a natural hazard into a disaster. A grievance-based theory of protests suggests that the underlying structural causes are social and economic group disparities, political exclusion, along with population pressures. To turn these all too common conditions into active political behavior requires a triggering event. When a damage – loss is the primary consequence of a disaster, the government and international community can compensate victims by providing rebuilding and reconstruction aid. However, when the disaster results in high numbers of fatalities, the government and international community cannot adequately compensate survivors for their losses. Grievances cannot be easily or effectively eliminated, and survivors and their supporters mobilize for change even if they are likely to face state repression. Clair Apodaca offers a unique contribution to our understanding of human rights violations. She effectively shows that there is a causal process between hazard events, protest activities, and government repression, a finding that is key to scholars, practitioners, and policy-makers working in this field.

This scholarly study of NASA's Marshall Space Flight Center places the institution in social, political, scientific, and technological context. It traces the evolution of Marshall, located in Huntsville, Alabama, from its origins as an Army missile development organization to its status in 1990 as one of the most diversified of NASA's field Centers. Chapters discuss military rocketry programs in Germany and the United States, Apollo-Saturn, Skylab, Space Shuttle, Spacelab, the Space Station and various scientific and technical projects including the Hubble Space Telescope. It sheds light not only on the history of space technology, science, and exploration, but also on the Cold War, federal politics, and complex organizations.

The Galileo mission to Jupiter explored an exciting new frontier, had a major impact on planetary science, and provided invaluable lessons for the design of spacecraft. This mission amassed so many scientific firsts and key discoveries that it can truly be called one of the most impressive feats of exploration of the 20th century. In the words of John Casani, the original project manager of the mission, "Galileo was a way of demonstrating . . . just what U.S. technology was capable of doing." An engineer on the Galileo team expressed more personal sentiments when she said, "I had never been a part of something with such great scope To know that the whole world was watching and hoping with us that this would work. We were doing something for all mankind." When Galileo lifted off from Kennedy Space Center on 18 October 1989, it began an interplanetary voyage that took it to Venus, to two asteroids, back to Earth, and finally on to Jupiter. The craft's instruments studied Jupiter's enormous magnetosphere and its belts of intense radiation. The spacecraft also sent off a planetary probe that accomplished the most difficult atmospheric entry ever attempted. After this, the craft spent years visiting Jupiter's moons and delving into their structures and properties. This book attempts to convey the creativity, leadership, and vision that were necessary for the mission's success. It is a book about dedicated people and their scientific and engineering achievements. The Galileo mission faced many significant problems. Some of the most brilliant accomplishments and "work-arounds" of the Galileo staff occurred precisely when these challenges arose. Throughout the mission, engineers and scientists found ways to keep the spacecraft operational from a distance of nearly half a billion miles, enabling one of the most impressive voyages of scientific discovery.

Enter the gray area between overheated imagination and overheated reality, and meet a network of scientists bent on creating artificial life forms, building time machines, hatching plans for dismantling the sun, enclosing the solar system in a cosmic eggshell, and faxing human minds to the far side of the galaxy. With Ed Regis as your guide, walk the fine line between science fact and fiction on this freewheeling and riotously funny tour through some of the most serious science there is.

This book examines Homo sapiens lost connection with nature and the aftermath, Homo sapiens excessive footprint on the Earth itself, the depredations done to Earth by Homo sapiens, the denial of global warming and other environmental issues, Frankenstein science and those attempting to play God, the conservation of Earth, what the future may perhaps entail, and going back to nature and coexisting on Earth. The book contains many statistical facts on the subject matter being discussed with more than 715 references within the bibliography and more than 120 graphs, satellite images, and other photographs. Some of the subtopics covered in this book include: Agriculture and the Origins of Modern Civilization, Meat, Dairy, and Egg Consumption, Current Medical Epidemics, Prescription Drug Epidemic, Mental Health and Drug Addiction, Government and Corporate Influence, Poverty, Money, Greed, and Corporate Responsibility, Warmongers, An Incarcerated and Policed Society Living with Unwarranted Fear, Guns, Religion, Suppression of History and Knowledge, Education and The Monetary Value of History and Knowledge, The Slaughter, Slavery, and Forced Assimilation of Indigenous Homo sapiens, Contemporary Slavery, Children, Women, Family and Individualism, The Mainstream News Media, World Population, Mass Consumption, A Surplus of Senseless Waste, Fashion, Cities, Water Consumption, Desertification, Surface Water, and Groundwater Depletion, Wastewater and Sewage Sludge, Watercraft, Mineral Extraction, Fossil Fuels, Nuclear Weapons and Power, Toxic Unnatural Chemicals, Fertilizers and the Nitrogen and Phosphorus Cycle, Pesticides, Atmospheric Pollution, Ozone Hole, Light and Sound Pollution, Hazardous Waste and Superfund Sites, Synthetic Plastic, Cannabis, Ocean Garbage Patches and Beach Trash, Lakes, Rivers, Wetlands, and Oceans, Coral Reefs, Fish, Whaling, Dolphin Driving, Military Dolphins, and Sonar, Shark Finning and other Ancient Pseudo Medicines, Zoos, Pets, Fauna Experimentation, Illegal and Legal Trade of Florae and Faunae, Hunting, Extinct Species, Endangered and Threatened Species, Invasive Florae and Faunae, Forests, Soils, Intentional Industrial Related Environmental Depredations, Oils Spills, Acid Rain, Homo sapiens Clash with Nature, Coexisting with Science and Technology, Environmental Legislation, Grassroots Efforts, Simple Individual Changes, Eco-Generation, Globalization and World Government, Homo sapiens Pseudo Connection with Nature, Homo sapiens Misconception of Nature, Unwarranted Fear of Nature, Lost Connection with Nature, and many other social and environmental issues past and present. What readers have to say: "Be forewarned, if you read this book and understand it fully, you will most likely not see the world the same way ever again and will contemplate much more about the world around you, society itself, and even yourself and the lifestyle you are living." "This book will make you think more about the Earth and how truly impactful and self-destructive we are." "This book is very insightful about the impacts we are having on Earth and how we are destroying not only ourselves but the entire Earth we inhabit." "Excellent book. Very sad, but very true." "I always knew we were destroying the Earth, but never at this magnitude." "This book contains so much useful information it's like an encyclopedia of the destruction of Earth." "A must read for any conservationist, environmentalist, or anyone interested in helping to save Earth." "If you don't believe in global warming or that we are destroying not only ourselves but the entire Earth around us, read this book and you will." "The most accurate and up to date statistics on the environmental and social issues currently facing humans." "A story which urgently needs to be told. I admire both the depth of the research and the passion with which the author brings it to life. I wish I could find more things to disagree with the author about."

A funny, weird and hugely entertaining memoir of travelling around the world in search of UFO landing sights, UFO believers and abductees.
